Standard Chartered

Application Process Guide

We are looking for aspiring graduates to build a Banking Technology career in **Trade Technology**, **Cyber Security Services** and **Trust, Data and Automation**. This is part of our strategy to develop sustainable local talent in Malaysia.

Please take the time to go through the instruction and Power Point slides before taking the test.

Below is the step-by-step guide on how to apply for the position:

1.0   REGISTRATION

- o   Kindly use Chrome to access the link for test. Next, enter **sc.com/graduates** to start the registration process.

- o   Students are encouraged to use their respective student ID as username and let the password be the one which they use for their personal email to access. It is highly recommended that the student only uses their **personal email address** while registering and not their Universities email address. This is because all the test links will be sent through the registered email address.

- o   The link will be activated from **5th August 2020 (Wednesday) 00:00am until 17th August 2020 (Monday) 11:59pm.** Therefore, please apply and complete the test within this time frame.

- o   To apply requisition ID: **GBSAPUMY20 // GBSSWUMY20 // GBSUMAMY20 // GBSUKMMY20 // GBSTAUMY20**

2.0   TEST

After the student completed their application, they will receive a link sent to their registered email address for the few tests.

- o   **The Strength Test** is not an elimination round and is merely a test for character analysis. The duration of the test is 25 minutes. On submission of the test, student will receive a result of the test i.e. report on their character strengths in their registered email address.

o The next round is the **Logical Reasoning Test**, and student will receive a link for the same once they have completed the Strength Test. It may take 15 mins to get the link. This is an elimination round. The duration is 25 minutes and upon submission student will immediately receives their score. The passing score for this is 40.

o For students who meet the passing score marks, they will receive the link for the next test in their email while the rest are eliminated from this point. Next is the **Numerical Test** and the duration is again 25 minutes and upon submission student will immediately receive their score.

o Only those who meet the passing score marks will move to the next round which is the **Coding test** (technical assessment) while the rest are eliminated from this point. The links will be activated on **13 August 2020 (Thursday) until 17 August 2020 (Monday)**.

Post completion of all the above test, shortlisted students will be invited for interviews (either virtual or face-to-face) process with the hiring managers.

Important Note:
We strongly recommend the student to **take time to practice** aptitude tests (especially timed LR and Numerical Ability Tests) available on the Internet (on test apps or from Google).

The **level of difficulty for all our tests is significantly higher** than the usual experience by the students. Hence, the rigorous practice will help in boosting the chances of cracking the tests.

Please let us know in case of any queries.

Regards,
Early Careers Team
